Credit Score Guidelines – Sample

FICTIONAL SAMPLE DOCUMENT — created for RAG chatbot testing. These terms are illustrative and are not real lender terms, legal advice, or a credit offer.

Role of Credit Score

Credit history and credit score can be considered as part of the loan assessment. They are not necessarily the only approval factor.

Illustrative Bands

For chatbot testing only: 750 and above may be described as a strong profile; 650–749 as a moderate profile; below 650 as a profile requiring additional assessment. These bands are illustrative and do not guarantee approval or rejection.

What Can Affect Score

Payment history, credit utilization, age of credit accounts, credit mix, and recent credit applications can affect a credit profile.

Improving Credit Profile

Pay obligations on time, keep revolving credit utilization reasonable, review credit reports for errors, and avoid unnecessary applications for new credit.

Late Payments

Late or missed payments can negatively affect credit history depending on the circumstances and reporting practices.
